

“DIY TUTORIAL – EASY SUNGLASSES CASE

June 18, 2014

<http://www.sewdiy.com/blog/2014/6/17/diy-tutorial-easy-sunglasses-case>

(These eyeglass covers will be distributed along with donated reading glasses to people in several international project sites by With God's Little Ones and other mission groups.)

1 piece fabric 7.75 x 9.5 inches
1 pieces ribbon or bias tape, cut 16 inches long

Step 1: Finish fabric edges. Fold fabric lengthwise, right sides together. (Folded size is 3 7/8 inches x 9.5 inches.) Mark points 1.5 inch and 2 inches from top on side. The section between the markings will be the opening for the drawstring.

Step 2: Starting at top edge, stitch to marking, backstitch and cut thread. Start stitching again at next marking (2 inches from top). Pivot at bottom corner, stitch to folded edge, backstitch and cut threads.

Step 3: Press seams open. Make the top casing. Fold top edge down 1.5 inches and press. Fold edge in .5 inch and press. Pin if needed. Topstitch casing in place, stitching close to folded edge about 1 inch from top.

Step 4: Attach one end of ribbon to safety pin. Thread through casing. Knot ends if desired.
